

ONGOING CALLS FOR TENDER

[Home](#) → [Procurement](#) → [Ongoing calls for tender](#)

SatCen is now part of the eTendering platform (<https://etendering.ted.europa.eu>) for managing calls for tender, which consists of the publication of tender documents and the management of questions and answers concerning the specifications and the procedure.

A list of ongoing calls for tender is provided below. Please follow the relevant links to gain access to all tender documents. The documents will be visible and downloadable, but in order to use some options on the eTendering website, users will need to log in. Once logged in, users have the option to `subscribe` to a call for tender which will mean they receive notifications for events like the publication of new documents. Moreover, this will allow users to ask questions related to the call for tender.

Thank you for your interest in our calls for tender.

It is the tenderer's responsibility to check for any updates and modifications to the documentation during the tendering period. These will be accessible by following the eTendering link for the relevant procedure.
